DICKIES WORKWEAR

BUYER'S GUIDE 2019/2020

UK

**DICKIES IS THE WORLD'S LEADING PERFORMANCE WORKWEAR BRAND. WE UNDERSTAND THAT MAKING AND SHAPING THE WORLD DEMANDS DEDICATION FROM EVERY MAN AND WOMAN WHO TAKE ON THE CHALLENGE. ACHIEVING YOUR AMBITIONS ISN'T EASY AND NO ONE EVER SAID IT SHOULD BE. THAT'S WHY WE TAKE SUCH PRIDE IN CRAFTING WORKWEAR THAT WON'T LET YOU DOWN - WHATEVER OBSTACLES GET IN YOUR WAY. OVER THE PAST CENTURY OUR CLOTHING, WITH ITS ICONIC DICKIES LOGO, HAS SET THE STANDARD FOR SAFETY AND COMFORT.**

**WE LISTEN TO WHAT YOU TELL US - TO ENSURE EVERYTHING WE MAKE FITS THE WAY YOU WANT. WE'RE NOW A GLOBAL BRAND WITH STYLES TAILORED TO SUIT THE TASTES, CONDITIONS AND DEMANDS OF A HARD-WORKING WORLD. WE'RE COMMITTED TO EMPLOYING THE MOST CUTTING-EDGE MATERIALS, MANUFACTURING PROCESSES AND PERFORMANCE MATERIALS AS WE STRIVE TO CREATE INNOVATIVE SOLUTIONS THAT MEET THE CHANGING NEEDS OF OUR MAKERS.**

**OUR SAFETY FOOTWEAR PROVIDES THE RIGHT LEVEL OF PROTECTION WHERE IT MATTERS MOST AND CONFORMS TO ALL CURRENT SAFETY REGULATIONS. OUR ICONIC COVERALLS HAVE BEEN CHERISHED FOR GENERATIONS, WHILE OUR RANGE OF WORK TROUSERS, OUTERWEAR AND HI-VIS CLOTHING CAN COPE WITH THE MOST CHALLENGING OF CONDITIONS.**

**IT'S LITTLE SURPRISE THEN THAT WE'RE THE WORLD'S TRUSTED LEADER IN WORKWEAR. WE GET IT: THE CHANGING WORLD OF WORK REQUIRES US ALL TO BE EVER-ADAPTABLE. WE KNOW WHAT YOU NEED TO GET THE JOB DONE AND WE'RE DETERMINED TO HELP YOU DO IT. WE'RE HERE TO CHAMPION THE DIGNITY OF YOUR WORK AND INSTILL THE CONFIDENCE IN YOU TO CREATE A BETTER WORLD.**

# GDT

# GDT PREMIUM

The popular GDT collection is a smart and functional cotton based workwear range. Available in lightweight 210g/m<sup>2</sup> and regular 290g/m<sup>2</sup> fabric weights as well as GDT Premium options the Dickies GDT range is durable and fashionable professional workwear.

## HARD WORKING SINCE 1922 DICKIES NEW WORKWEAR RANGE

The New Hard Working Since 1922 range gives you a more contemporary look without compromising on durability and comfort. The collection includes a range of t-shirts, sweatshirts and puffer jackets featuring traditional Dickies branding that means the Dickies Hard Working Since 1922 range can be worn in your leisure time as well as work time.

# DICKIES PRO WORKWEAR

The Dickies PRO range is premium workwear that offers superb ergonomic fit along with exceptional comfort and breathability. Over 18 months of product development have gone into producing the Dickies PRO range making Dickies PRO our most advanced range of products to date.

## EVERYDAY WORKWEAR

The Dickies Everyday Range is the go-to range for style, comfort, durability, and value. The Everyday 24/7 range includes jackets, trousers, body warmers, shorts & matching two tone tops. ED24/7 products also come in a variety of colour options.

# FITTED TO WORK

Dickies work trousers are constructed to cope with whatever life throws at you. Made from advanced, high performance materials such as CORDURA®, polycotton fabric, TenGate® European fabric stretch. Many of our workwear trousers are designed to provide ergonomic 3D fits for ease of movement. We have 5 different fits including Slim, Tapered and Regular so we have your preference covered. Regardless if you are short, regular or tall Dickies Workwear Trousers has one of the widest size ranges in the industry meaning you are FITTED TO WORK.

# EMBROIDERY PRINTING SERVICES

Embroidery & printing is one of the first enhancements most customers look at when considering customising of Dickies Workwear apparel. A logo announces to the world who you represent, and a strong first impression can make a big difference in business. Dickies Embroidery and Printing Service can add logos or specified text to the vast majority of our product range. All you need to do is to contact us with your details and allow us to do the rest.

#### We will require the following:

- ✂ Your company name and/or account number and contact details.
- ✂ The logo details with preferably a JPG or BMP image file if possible.
- ✂ Any specific Pantone colours that you wish us to adhere to.
- ✂ The products and colours that you would like to embellish.
- ✂ The position of the logo(s) e.g. left breast area, back etc.
- ✂ The number of embellishments you require.

# SOLE TECHNOLOGY

## DTW SOLE TECHNOLOGY WELTED

## DTI SOLE TECHNOLOGY INJECTED

## DTC SOLE TECHNOLOGY CEMENTED

1

### OUTSOLE

Bonded to the midsole, the outsole provides grip and stability during walking and protects against wear and tear. Can be moulded in a variety of materials.

2

### MIDSOLE

A layer of moulded light weight material which provides shock absorption at heel strike and propulsion at launch during the walking cycle.

3

### ANTI-PENETRATION INSERT

A metal or composite insert which prevents puncture from sharp objects through the bottom of the footwear.

4

### FOAM FILLER

Fills the cavity created by the welt and provides additional underfoot comfort.

5

### WELT / STITCHING

A strip of material that joins the upper to the sole. A strong thread attaching the welt to the midsole.

6

### INSOLE

An internal component that the upper and welt are stitched to, forming the upper part of the shoe before the sole is attached.

7

### INSOCK

A layer of cushioning material that sits inside the shoe, to provide underfoot comfort. Sometimes removable.

8

### TOE-CAP

A metal or composite material, this protects the wearers toes as well as helping to maintain the structure of the footwear.

## WHAT IS PU?

Polyurethane is a combination of Polyols & Isocyanates. When mixed together during the moulding process, a chemical reaction occurs and the Isocyanates cause the Polyols to expand and fill the sole mould. The rate of expansion can be controlled. The more Isocyanate added, the quicker the expansion occurs, increasing the amount of air in the material. This can make the soles softer and more flexible, but also weaker. It is therefore important that the correct density of compound is used and a good balance between hardness and strength is achieved.

## WHAT IS EVA?

Ethylene-Vinyl Acetate is an elastic co-polymer very similar to rubber used in many industrial applications. EVA is formed by expanding plastic and trapping pockets of air in various densities. It resists cracking and hardening and offers good cushioning and rebound qualities. EVA is also UV resistant and stays flexible at low temperatures, making it ideal for outdoor footwear. It is considered environmentally friendly as chlorine is not used in its production. EVA is also easily recycled into everyday products.

SRA  
SLIP  
RESISTANCE

Slip resistance on a ceramic tile  
floor with sodium lauryl sulphate  
solution

## SB-P FOOTWEAR

# SAFETY CLASSIFICATIONS

Safety footwear standard EN345 is being superseded by EN ISO 20345. Any footwear that has been tested to EN345 can continue to be sold, however any new designs will have to be tested to the new standard.

Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe.

### SB-P

Toe protection tested with 200 joules impact and 15kN compression force. 'P' refers to penetration resistance outsole.

# SB-P FOOTWEAR

Our SB range of footwear provides the right level of protection where it matters most. Reinforced toe caps ensure all basic safety requirements are met - offering defence against impacts of up to 200 Joules. Whether the classic Cleveland or the rugged Grafton, these boots deliver.

## SAFETY CLASSIFICATIONS

Safety footwear standard EN345 is being superseded by EN ISO 20345. Any footwear that has been tested to EN345 can continue to be sold, however any new designs will have to be tested to the new standard.

Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe.

### SB-P

Toe protection tested with 200 joules impact and 15kN compression force. 'P' refers to penetration resistance outsole.

### S1

As SB, plus:

- Closed seat region (fully enclosed heel)
- Anti-static properties
- Energy absorption of seat region
- Resistance to fuel and oil

# S1-P FOOTWEAR

An added level of safety comes as standard with our S1 footwear. A closed heel area as well as anti-static, energy-absorbing and fuel-resistant properties combine to provide formidable levels of protection. There's an enviable array of styles, encompassing trainers, shoes and boots.

# SAFETY CLASSIFICATIONS

Safety footwear standard EN345 is being superseded by EN ISO 20345. Any footwear that has been tested to EN345 can continue to be sold, however any new designs will have to be tested to the new standard.

Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe.

## SB-P

Toe protection tested with 200 joules impact and 15kN compression force. 'P' refers to penetration resistance outsole.

## S1

As SB, plus:

- Closed seat region (fully enclosed heel)
- Anti-static properties
- Energy absorption of seat region
- Resistance to fuel and oil

## S2

As S1, plus:

- Water penetration and absorption resistance

## S3

As S1, plus:

- Penetration resistance
- Cleated outsole

# S3 FOOTWEAR

200 Joule toe-cap protection. Closed seat region (fully enclosed heel). Anti-static properties. Energy absorption of seat region. Water penetration and water absorption resistance. Plus penetration resistance. Cleated outsole.

Slip resistance on steel floor with glycerol and ceramic tile floor with sodium lauryl sulphate solution

# SAFETY CLASSIFICATIONS

Safety footwear standard EN345 is being superseded by EN ISO 20345. Any footwear that has been tested to EN345 can continue to be sold, however any new designs will have to be tested to the new standard.

Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe.

### SB-P

Toe protection tested with 200 joules impact and 15kN compression force. 'P' refers to penetration resistance outsole.

### S1

As SB, plus:

- Closed seat region (fully enclosed heel)
- Anti-static properties
- Energy absorption of seat region
- Resistance to fuel and oil

### S2

As S1, plus:

- Water penetration and absorption resistance

### S3

As S1, plus:

- Penetration resistance
- Cleated outsole

### S4

Upper from all rubber or all polymeric with:

- SB toe protection
- Closed seat region
- Anti-static properties
- Energy absorption of seat region
- Resistance to fuel and oil

### S5

As S4, plus:

- Penetration resistance
- Cleated outsole

# WELLINGTONS & NON-SAFETY BOOTS

Give it some welly with our extensive range of Wellington boots. We've got high-performance Landmasters that fulfil site safety requirements and sturdy Pennines that are at home on the farm. We've also got a range for those who require a durable work boot without toe caps.

## COVERALLS, FR & BIB AND BRACES

# COVERALLS, FR & BIB AND BRACES

Our iconic coveralls are some of our most popular items, and it's easy to see why. Highly durable, with an abundance of features including multiple pockets, fasteners and an elasticated back, it's the ultimate in workwear. We also offer flame retardant and hi-vis options as well as bib and brace dungarees.

All Dickies flame retardant products are certified and tested by BTTG™. With almost a century's experience in textiles and related products, BTTG™ is the leading independent organisation for the testing & certification of Personal Protective Equipment and Construction Products.

# HEAT AND FLAME PROTECTION GUIDE

## SYMBOL GUIDE

### Made to Order (MTO)

Our Made to Order (MTO) products are available for quantities greater than 500 pieces. In addition to our catalogue MTO's customer bespoke products can also be designed and produced for corporate clients.

### EN ISO 11612

Protective clothing for workers exposed to heat and flames (not including Welders and Fire Fighters).

The standard specifies the performance requirements for garments which protect the body from heat and flame.

### EN ISO 11611

Protective clothing for use in welding and allied processes.

The standard specifies 2 classes with specific performance requirements:

- Class 1 lower level: less hazardous welding situations.
- Class 2 higher level: more hazardous welding situations.

### EN 1149-5

Protective clothing - electrostatic properties.

Antistatic PPE are certified to EN 1149-5:2008 as this standard covers the performance requirements and refers to the choice of 2 different test methods (EN 1149-1 or EN 1149-3).

### EN ISO 13758 - 2 : 2003 (UPF 40+)

Textiles - Solar UV protective properties.

Describes the classification and marking of sun-protective clothing. An Ultraviolet Protection Factor (UPF) shows how much solar ultraviolet radiation (UVR) is reduced when passing through fabric of clothing. It is similar to the sun protection factor (SPF) used for sunscreens.

Suitable for industrial laundry at 75°C

Suitable for domestic laundry

## GENERAL

A user guide is included with all our garments. We recommend that this be read carefully as the guide gives important information about the protection the garment provides along with wash care instructions and important information that contributes to optimal protection for the wearer. Jacket and Trousers should always be worn together as an ensemble to ensure maximum protection.

ISO standards are under constant revision and our designs are regularly revised and updated to ensure compliance to the latest standards. Dickies also manufacture garments to comply with many different International Safety Standard requirements such as NFPA and others upon request.

Most of our garments can be customised with your corporate badges and logo's. We can also accommodate requirements for bespoke customised garment design requests from our larger customers ensuring a unique corporate identity. Please contact us for more details.

## PYROVATEX®

Cotton fibres treated with a crosslink resin utilising the heat-cured dialkylphosphonamide process that forms a bond on the molecular level to the cellulose in the cotton fibres. This creates a very strong, durable and protective link that makes the fabric resistant to shrinking or melting when exposed to heat and flame. Our Pyrovatex® fabrics are made from high quality cotton fibres, consequently they are lightweight and comfortable with excellent durability to wash and wear, ensuring Dickies Workwear a long lifetime.

## LAUNDRY CARE

Flame retardant clothing should be laundered strictly in adherence with the instructions on the care label in every garment, if in any doubt please consult with Dickies as to how to best care for your workwear. Poor laundry care can have a serious adverse effect on a safety garment. For example water which is too hard affects the cleaning process and may contain mineral salts to build up on the fabric, deposits of this type can adversely affect the FR properties of the clothing and in extreme cases of build-up can actually exacerbate the flammability of the clothing and act as an accelerant if exposed to an ignition source. cotton, Aramid and Modacrylic garments can be laundered using the recommended temperatures and wash cycles. Some 3% minimal shrinkage can be expected and is a natural reaction from both the fibres and the weave construction, most noticeable during the first 3 to 5 washes. Please be careful not to "over dry" garments. Dickies recommend that this is taken into consideration when selecting your preferred garment. Exposure to excessive drying temperatures will result in higher than normal shrinkage. Starches, fabric softeners, and other laundry additives should be avoided. DO NOT USE CHLORINE BLEACH OR OTHER DETERGENTS OR CHEMICALS CONTAINING HYDROGEN PEROXIDE.

## OUTERWEAR

# OUTERWEAR

The Great Outdoors can be an unpredictable environment, so be prepared for any eventuality with our range of jackets, fleeces and gilets. The Stamford Puffer has a slim, modern look, while the Cambridge Jacket will keep you dry in a downpour. Extensive hi-vis options complete the collection (see pages 250-251).

# HI-VIS

## EN 343

Protection against rain

X  
Y

Resistance to water penetration and water vapour resistance are the two main properties which are tested in EN 343.

The following parameters are used:

**X** Resistance to water penetration (3 levels of which 3 is the highest achievable class).

**Y** Water vapour resistance - Breathing properties (3 levels of which 3 is the highest achievable class).

## RIS-3279-TOM

The Railway Group Standard G0/RT 3279 has been updated, and replaced by The Rail Industry Standard: RIS-3279-TOM.

\*As there are no technical changes to the standard, all Dickies garments that are certified to G0/RT 3279 will be automatically compliant to the new RIS-3279-TOM standard.

# HIGH VISIBILITY

High visibility (Hi-Vis) clothing and workwear is a key area for Dickies in the UK. Conformity to EN471 British Standard is a must. Of course, our range includes hi-vis jackets, trousers, the classic high visibility vest & much more...

## EN ISO 20471:2013

The following pictogram placed on a garment indicates adherence to the EN ISO 20471 standard.

X

**X** Classification of the applied surface of fluorescent and retro reflective material Classes 1 to 3 (of which class 3 is the highest achievable class)

EN ISO 20471 classification of fluorescent and retroreflective surface (X)

	CLASS 1	CLASS 2	CLASS 3
Fluorescent material	0,14m <sup>2</sup>	0,50m <sup>2</sup>	0,80m <sup>2</sup>
Reflective tape	0,10m <sup>2</sup>	0,13m <sup>2</sup>	0,20m <sup>2</sup>

# HIGH VISIBILITY

Having the right hi-vis gear is utterly essential. Our entire range conforms to the required EN471 British Standard. And it includes just about everything you could possibly require - including safety waistcoats, hoodies, T-shirts, jackets and trousers. There's plenty of waterproof options too.

## ACCESSORIES

# ACCESSORIES

Our commitment to quality and comfort doesn't just extend to our clothing - it's in every item we manufacture. The bags, socks, belts and more in our accessories range are all produced to the same high standards. Knee pads and insoles for work boots offer added comfort too.
